The Ideal Helicopter.

The Perfect Way to Advance from Coaxials or Quads.

CHRONOS

Ultra-Micro

Fly Indoors or Out

The ultra-micro sized Chronos FP 110 features larger-in-class size for improved performance and handling while flying outdoors in winds up to 5-7 mph, yet is small enough to fly indoors with ease.

Learn more about the features

Digital Servos

Separate 1.7-gram digital servos offer precision control and easy maintenance in comparison to integrated servos found in similar class helis. Plus, the two-stage gear train is durable, quiet and efficient.

Learn more about the features

Superior Handling

The advanced fixed-pitch and self-stabilizing rotor head design offers the agility of a single-rotor heli with the stability characteristics of a coaxial. Advancing your flight skills has never been this easy, whether indoors or outdoors!

The Chronos FP110 Story

When you're ready to advance from coaxial helis or quadcopters to single-rotor heli flying, there's no better choice than the Ares (air-eez) Chronos FP 110. With its advanced fixed-pitch and self-stabilizing rotor head design, it offers the agility of a single-rotor heli along with the stability of a coaxial platform, making it easier to learn the basics of more advanced flight with confidence.

The ultra-micro sized Chronos FP 110 is a larger in class heli for improved performance and handling when flying outdoors in winds up to 5-7 mph, yet is small enough to fly comfortably indoors. It's also equipped with class-leading features such as separate 1.7-gram digital servos, a quiet and efficient two-stage gear-train, plus a lightweight yet durable airframe that is 100% factory-assembled and ready-to-fly out of the box!

Within the box you'll find everything needed for flight which includes a 4-channel transmitter that operates on 2.4 GHz technology with an LCD screen and dual rate function, AA batteries, 500mAh 1S 3.7V LiPo battery and a charger that conveniently charges from almost any AC outlet. With nothing extra to buy, you'll be flying within minutes of opening the box!

So whether you're a first-time single-rotor or experienced heli pilot, there's no better way to enjoy ultra-micro FP heli flying and no better value than the Chronos FP 110.

Ready-to-fly

The Chronos FP 110 is fully-assembled and ready-to-fly right out of the box!

Self-stabilizing Rotor Head

The advanced fixed-pitch and self-stabilizing rotor head design offers the agility of a single-rotor heli with the stability characteristics of a coaxial.

Battery/Charging

Includes a LiPo battery and charger that conveniently charges from almost any AC outlet.

Digital Servos

Separate 1.7-gram digital servos offer precision control and easy maintenance in comparison to integrated servos found in similar class helis.

Indoors or Out

The ultra-micro sized Chronos FP 110 features larger-in-class size for improved performance and handling while flying outdoors in winds up to 5-7 mph, yet is small enough to fly indoors with ease.

Quiet Performance

A quiet and efficient two-stage gear train for smooth performance.

Specifications

Length:	11.6in (295mm)
Height:	4.3in (110mm)
Main Rotor Diameter:	11.6in (295mm)
Weight with Battery:	3.2oz (90g)
Main Motor:	N40 (installed)
Tail Motor:	Micro Coreless (installed)
Battery:	500mAh 1S 3.7V LiPo (included)
Charger:	1S 3.7V LiPo AC (included)
Transmitter:	4-Channel 2.4GHz (included)
On-Board Electronics:	4-in-1 receiver/2 ESCs/mixer/gyro/and 2 servos (installed)

What else

Whats in the BOX

- ▶ 2.4GHZ transmitter
- ▶ 500mAh 1S 3.7V LiPo battery
- ▶ AC charger
- ▶ Chronos FP 110 Ultra-Micro Helicopter RTF
- ▶ 6 - AA batteries (for transmitter)
