

## **LiFePo Receiverpacks**

05/18/2012 13:05 by Admin (comments: 0) Robitronic

### **LiFePo Receiverpacks 6,6V**

Receiverpack in a hardcase for nitro cars.

Often the 7,4 Voltage from a LiPo Pack ist to much for receivers or servos. If you do not want to use a regulator, you can use Robitronics LiFePo Pack with 6,6 Volt directly!

**LiFe 6,6V; 2000mAh, 2/3A Hump**

**Item No.: R05208**

Technical Data:

- 2/3A Hump,
- Type: LiFePo
- Capacity: 2000mAh (Hump, R05208)
- Voltage: 6,6V (2S)
- Energie: 13,2Wh
- Measures: (LxBxH) 56x32x32mm
- Weight: 95g.
- Charge: 1C

Note: Max Voltage per cell: 3,6V (charge), min Voltage per cell: 2,3V (discharge)

## LiFe 6,6V; 1600mAh, 2/3 Straight

**Item No.: R05205**

### Technical Data:

- 2/3A Straight,
- Type: LiFePo
- Capacity: 1600mAh
- Voltage: 6,6V (2S)
- Energie: 10,5 Wh
- Measures: (LxBxH) 85x30x17mm
- Weight: 80g.
- Charge: 1C

Note: Max Voltage per cell: 3,6V (charge), min Voltage per cell: 2,3V (discharge)
