

Micro, powerful, reliable - brandnew XRotor FPV combo!

10/09/2017 09:10 by Admin (comments: 0) HW38040023 XRotor FPV Combo by Hobbywing

XRotor FPV Combo 30A 2405-2600kV including 5045 propeller

Brandnew by HOBBYWING is the **Quadcopter Drone Power Pack, featuring Hobbywing 2405-2600 Brushless Motors and Hobbywing XRotor 30A ESCs (HW38040023)**. This XRotor FPV Combo - exceptionally small and lightweight - is designed for competition, ensures higher efficiency and less heat.

With a weight of only 6g, the XRotor Micro comes with original **BLHeli_S firmware designed specifically for competition FPV drones**. The XRotor system supports Oneshot 125/42, Multishot and Dshot150/300/600, as well as regular PWM throttle signals. Upgrades for the firmware are available via ESC signal cable and program up to four ESCs at the same time.

Enjoy **smooth throttle response and silent operation** thanks to the ESC firmware with hardware-generated motor PWM. Using regenerative braking, the XRotor motor has fast motor retardation and active freewheeling. Interferences caused by signal transmission are greatly reduced by the twisted-pair throttle signal cable which also increases **flight stability and reliability** for multi-rotor drones.

Features:

- 24mm Stator Width; 5mm Stator Height - Low CG design
- Integrated locking teeth to secure prop even under prop strikes
- Integrated cooling fan design
- Aluminum Allow motor design - Incredible durability
- N54 High Strength Magnets
- 0.2mm Stator Laminations
- 4mm Thick Bearings
- 35.5g AUW

Box content:

- 4 x XRotor 30A Micro BLHeli-S DShot600 ESC (HW30901075)
- 4 x XRotor 2405 2600KV Motor (HW30405401)
- 2 x Blue Fiberglass 5045 Propeller CW
- 2 x Blue Fiberglass 5045 Propeller CCW
- 16 x Black Hex Socket Screw M3x6
- 16 x Black Hex Socket Screw M3x8
- 4 x Black Locknut M5
- 1 x T Socket Spanner
