

Fuel Shut Off

05/12/2014 11:33 by admin (comments: 0) Robitronic

Usefully helper for assembling or disassembling of nitro engines or tanks. The "fuel shut off" prevents leakage of the fuel for easy and clean working on the car.

This tool can be clamped to the fuel hose and a button can be pressed on the end of the tube. This makes the tube 100% sealed, even if the vehicle or the tank is placed on its side or upside down.

With this useful tool the pollute of clothes, car and pits belongs to the past!
