

SKYRC SOKAR FPV RTR Drone

03/02/2016 18:37 by admin (comments: 0) SKYRC

SKYRC Sokar FPV Drone is a high performance quadcopter with FPV camera, video transmitter, video monitor and remote controller. Lipo battery and charger are included also so it's really RTF (Ready to Fly). You just need to recharge the battery and can start flying.

Sokar is driven by four 2204 motors (2300KV), which not only ensures the advantage of speed, but also increases the stability of SOKAR.
