

6X80+ Blue Version Charger (SK100068)

# FINALLY, YOUR CHARGER GETS ITS OWN APP

Made for  
iPod iPhone iPad

Available on the  
App Store

ANDROID APP ON  
Google play

## 6X80+

Blue Version

Professional Balance Charger / Discharger  
Lithium Battery Meter / Motor RPM Tester / Servo Tester

10 80Watt  
AMP

AC/DC  
FAST CHARGER

Bluetooth™

Download on the  
App Store

Scan with  
your iPhone  
to download.

Download on the  
Google play

Scan with  
your Android  
to download.

## **Optimized Operating Software**

SKYRC 6x80 Plus features the so-called AUTO function that set the feeding current during the process of charging or discharging. Especially for lithium batteries, it can prevent the overcharging which may lead to an explosion due to the user's fault. It can disconnect the circuit automatically and alarm once detecting any malfunction. All the programs of this product were controlled through two way linkage and communication, to achieve the maximum safety and minimize the trouble. All the settings can be configured by users!

## **Internal Independent Lithium Battery Balancer**

SKYRC 6x80 Plus employs an individual-cell-voltage balancer. It isn't necessary to connect an external balancer for balance charging.

## **Balancing Individual Cells Battery Discharging**

During the process of discharging, SKYRC 6x80 Plus can monitor and balance each cell of the battery individually. Error message will be indicated and the process will be ended automatically if the voltage of any single one cell is abnormal.

## **Adaptable to Various Type of Lithium Battery**

SKYRC 6x80 Plus is adaptable to various types of lithium batteries, such as LiPo, LiIon and the new LiFe series of batteries.

## **Fast and Storage Mode Lithium Charge**

Purposes to charge lithium battery varies, 'fast' charge reduce the duration of charging, whereas 'store' state can control the final voltage of your battery, so as to store for a long time and protect useful time of the battery.

## **Cyclic Charging/Discharging**

1 to 5 cyclic and continuous process of charge>discharge or discharge > charge is operable for battery refreshing and balancing to stimulate the battery's activity.

## **Data Store/Load**

The charger can store up to 10 different charge/discharge profiles for your convenience.

You can keep the data pertaining to program setting of the battery of continuous charging or discharging. Users can call out these data at any time without any special program setting.

## **Terminal Voltage Control (TVC)**

The charger allows user to change the end voltage.

## **LiPo Battery Meter**

The user can check battery's total voltage, the highest voltage, the lowest voltage and each cell's voltage.

## **Motor RPM Tester**

Users connect the sensor motor and charger with sensor wire, set the pulse width and test the RPM of the motor.

## **Servo Tester**

Connect the servo and the charger with wire, change the pulse width value and check whether the servo works or not.

## **Re-Peak Mode of NiMH/NiCd Battery**

In re-peak charge mode, the charger can peak charge the battery once, twice or three times in a row automatically. This is good for making certain the battery is fully charged, and for checking how well the battery receives fast charges.

## **Delta-Peak Sensitivity NiMH/NiCd Battery**

Delta-peak sensitivity for NiMH/NiCd battery: The automatic charge termination program based on the principle of the Delta-peak voltage detection. When the battery's voltage exceeds the threshold, the process will be terminated automatically.

## **Automatic Charging Current Limit**

You can set up the upper limit of the charging current when charging your NiMH or NiCd battery, it is useful for the NiMH battery of low impedance and capacity in the 'AUTO' charging mode.

## **Capacity Limit**

The charging capacity is always calculated as the charging current multiplied by time. If the charging capacity exceeds the limit, the process will be terminated automatically when you set the maximum value.

## **Temperature Threshold**

The battery's internal chemical reaction will cause the temperature of the battery to rise. If the temperature limit is reached, the process will be terminated.

## **Processing Time Limit**

You can also limit the maximum process time to avoid any possible defect.

## **PC Control Software "Charge Master"**

The free "Charge Master" software gives you unparalleled ability to operate the charger through the computer. You can monitor pack voltage, cell voltage and other data during the charging, view charge data in real-time graphs. And you can initiate, control charging and update firmware from "Charge Master".

## **APPS for Smart Phone (iOS and Android)**

Finally, your charger gets its own apps. This charger can be controlled and operated by smart phones.

### TECHNISCHE DATEN

Input Voltage	AC Input: 100-240V DC Input: 11-18V
Controls	Enter/Start Rotary Dial, Mode/Stop Button
Bluetooth	Available
Display Type	63.40x14.54mm LCD screen
Display Backlight	Blue
Case Material	Plastic
Cooling System	1 Built-in 30x30x7mm fan
PC Communications	USB Port for PC Control & Firmware Upgrade
External Port	Temp Sensor, Servo/ESC Port, Brushless Motor Sensor Port, AC Input Power Port, Balance Socket, USB Port for PC
Delta Peak Detection	3-15mV/cell
Charge Cutoff Temperature	20-80°C
Charge Voltage	LiPo: 4.18-4.30V/cell LiIon: 4.08-4.20V/cell LiFe: 3.58-3.7V/cell
Balance Current	200mA/cell
Voltage Range	0.3 - 5.0V/cell
Maximum Cells	LiPo/LiFe/LiIon: 1-6 cells

Battery Capacity Range	NiMH/NiCd: 1-15 cells
Charge Current	Pb: 2-20V
Charge Wattage	100-50000mAh
	0.1-10A
	AC: 50W
	DC: 80W
Safety Timer	1-720 minutes, Off
Discharge Current	0.1-2A
Discharge Wattage	8W
Discharge Cut-off Voltage	NiMH/NiCd: 0.1-1.1V/cell
	LiPo: 3.0-3.3V/cell
	LiIon: 2.9-3.2V/cell
	LiFe: 2.6-2.9V/cell
	Pb: 1.8V
Balance Cells	6 cells
Memory	10 charge/discharge profiles
Charge Method	CC/CV for lithium types and lead batteries, Delta-Peak for NiMH/NiCd
Weight	525g
Dimensions (LxWxH)	135x112x60.9mm
